LARS® streamlines bindery automation

- Local or a network-based installation
- Customized reporting capability
- FTP data transfer

Interested in Getting LARS Library?

If you are interested in getting LARS for your library, please contact your account representative or send an email to lars@thehgroup.com.

About LARS

LARS is a binding automation solution that helps manage the flow of materials between the library and the bindery.

Easy to Use

Its easy-to-use graphical interface provides access to your library's permanent periodical database. A collection of standard and customizable templates simplifies the process of preparing new titles or one-time-bind items. Binding history is stored in the library's database, and reports provide detailed information about binding activity.

LARS offers a variety of standard reports and custom reports are also available.

Shipment data is transferred via FTP, eliminating the need for media exchange.

A Complete Solution

When you are ready to use LARS, we will coordinate the process of creating an installation kit using your existing titles. We can convert your data from most commonly-used binding automation systems.

Once your data is loaded, we provide step-by-step self-training materials. Our skilled Technical Support staff is also available to you toll-free, during business hours, Monday through Friday.

We will follow up with your staff to ensure a successful transition.
